

Compile Shelf

The Compile Shelving System is a simple design that allows for a number of possible permutations. Comprised of shelves and three heights of dividing tubes, the system can be configured as desired to be used as a room divider or against a wall in the home or any professional space. Shelves are made from laser cut steel sheets, bent to form, and then coated with high quality powder coating. This coating gives the shelves a matt, abrasionresistant and fingerprint-insensitive surface. Compile systems should always be mounted to a wall, using wall brackets. A Compile Shelving System can hold up to 300 kg. Compile Shelving Systems can be built as tall as wanted, as long as they are mounted to a wall using brackets. Muuto recommends not building Compile systems higher than 2,25 meters.

Brand: **MUUTO**

Item type: Shelf System

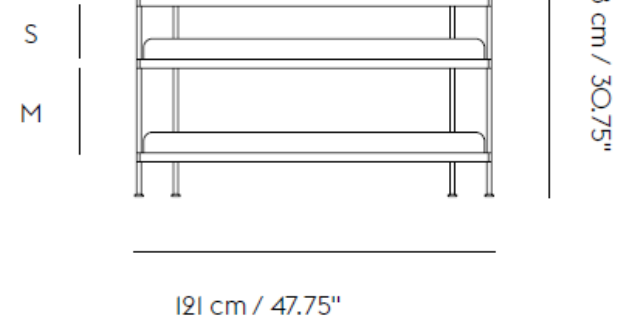

Item code: 50056

Designer: Cecilie Manz

Config.: 2 / Grey

Dimension: 121 x 78 cm

CONFIG. 2
