

### Soap Mini

Varied colors, transparency and continuously changing shapes - the characteristic features of soap bubbles- inspired this BOMMA collection. When lighted, the metallic sheen of its surface transforms to iridescent and translucent, exposing its crystal character. The entire collection is produced using the technique of hand-blowing without a form. The seemingly perfect droplet of molten glass is given a unique shape as well as a unique color spectrum. The Soap Mini collection allows unlimited space for your creativity, with the option to create as large groups of crystal drops as you fancy - from smaller compositions to expansive light constellations.
