

### Soho

The outdoor living armchair of the Soho collection recalls the nautical world with an elegant net created by the rope, interrupted by wooden slats, running along the structure and becoming particularly visible in the armrests of the armchair. The play between full and void lines, so elegant and visually flexible, is the result of the perfect balance of the materials: powder-coated aluminium for the structure, synthetic fabric rope, cylindrical teak slats, quick dry foam padding. The cushions are removable, easy to wash and weather resistant.
